

2019 Collision Damage Appraisal Demonstration Competition

Maryland Instructors, (3/1/19)

This is the first year SkillsUSA Maryland is offering the Collision Damage Appraisal (CDA) demonstration competition. Before we can move forward in planning and facilitating this demo we need to know the level of student and instructor interest. As the CDA state contest chair, specific contest-related questions should come be directed to me. Information shared with one instructor will be shared with all instructors/students via the SkillsUSA Maryland state contest update page.

I'm looking forward to facilitating the CDA demo for SkillsUSA Maryland. Some background: I serve on the National SkillsUSA CDA technical committee and have the experience and knowledge required to successfully facilitate a state demo that aligns to the national demo. I have already begun meeting with industry partners and formed a committee in anticipation of moving forward.

The CDA demonstration contest at the 2018 SkillsUSA National Leadership and Skills Conference (NLSC) was successful and very well received by the industry. As a leader in this industry we need to fill positions both in the estimator/adjuster fields. I look forward to hearing from you soon.

Thank you,

Elizabeth Meckel
